

Appl. No. 10/151,350
Amdt. Dated September 23, 2003
Reply to Office Action of June 23, 2003

Amendments to the Specification:

Beginning at page 35, immediately after line 36, please insert the following paragraph:

—As shown in Figure 13, the blood vessel 32 has a true lumen TL that is defined by the normal anatomy of the surrounding blood vessel wall. The vessel wall defect or aneurysm 34 comprises an out-pouching in the wall of the blood vessel, as shown. For purposes of this patent application, it is to be understood that the interior of the vessel wall defect ID does not constitute a portion of the true lumen TL of the blood vessel, but rather is a pathological or abnormal outpouching of the vessel wall. Thus, the hollow interior of the vessel wall defect or aneurysm ID is not a portion of the true lumen TL of the blood vessel 32. —
